

I am a regular listener of a K-LOVE station at 93.3 FM in Charleston, WV. It has come to my attention that the introduction of new LPFM stations could disrupt the service I receive from K-LOVE. K-LOVE provides me with positive messages every day that I would not hear on any other radio station in my community. In fact, in many communities K-LOVE is the ONLY family-friendly station serving the community. If K-LOVE were displaced by a LPFM broadcaster, it would be nearly impossible to find positive programming on the radio. My listening is already sometimes interrupted by another station and I do not wish for this to continue. K-LOVE promotes wholesome values and encouragement to so many people that otherwise would live in a dark world. This is a public interest. It is my interest. Thank you and please do not allow LPFM stations to disrupt a service that is already wonderfully provided by K-LOVE.
